ABOUT ME

Congolese, 25 years old (born September 15, 2001), fluent in both French and English. Brings two complementary areas of expertise: 2 years of experience in commercial management — sales management, stock/inventory control, and customer service — and 2.5 years of experience in software development, building full-stack web applications from React/Next.js frontends to Node.js/Nest.js backends with PostgreSQL. Trained through two competitive, production-focused coding programs in Rwanda (acceptance rates <30%) and holds a Commercial Management diploma. Combines business discipline with modern software engineering, seeking a role where leadership, curiosity, and frontend-to-backend skills drive real impact.

EXPERIENCE

Full Stack Developer Intern (Remote) *May 2026 – Aug 2026*

Infinity Innovations Co.

- Working across the full stack: building frontend interfaces in Next.js and backend services and APIs in Nest.js, with PostgreSQL as the primary database.
- Designing and implementing RESTful API endpoints and integrating them with server-rendered and client-side Next.js pages.
- Modeling relational data and writing queries/migrations in PostgreSQL to support application features.
- Collaborating remotely with a distributed team using Git-based workflows, code review, and agile check-ins.

Bilingual Customer Service & Call Center Trainee *Jun 2026 – Jul 2026*

WEC Outsourcing

- Handled inbound and outbound customer interactions in a bilingual call center environment, resolving inquiries and escalations professionally.
- Communicated with clients in French and English, adapting tone and language to customer needs.
- Applied active listening and problem-solving skills to maintain service quality and customer satisfaction targets.

Software Developer (Advanced Track) *Jan 2026 – Apr 2026*

kLab Academy — Kigali, Rwanda

- Selected for advanced program focused on TypeScript, scalable architecture, and production deployment.
- Built UI prototypes in Figma that were directly translated into React components.
- Collaborated on Community Service Exchange project – a web app connecting volunteers with local organizations.
- Mentored 3 junior trainees in the cohort on Git workflows and React hooks.

Full Stack Developer (Intensive Program) *Mar 2024 – Feb 2025*

ALIGHT Rwanda Coding School — Gatsibo, Rwanda

- Completed competitive bootcamp (acceptance rate <30%). Out of 50+ applicants, among top performers.
- Mastered React, Vue.js, and Node.js in a production-focused curriculum.
- Led frontend development for the Alight Coding School Platform – coordinated with backend developers on API contracts.
- Recognized by instructors for rapid skill acquisition and clean code practices.

Sales Manager

2022 – 2023

Tassy Ltd — Cross-border trade, East Africa – DR Congo

- Managed sales operations for a company distributing natural tomatoes wholesale from East Africa into DR Congo.
- Coordinated closely with suppliers to ensure the quality and consistency of incoming produce before onward sale to customers.
- Handled customs and border declarations for merchandise, ensuring compliance for cross-border trade shipments.
- Built and maintained relationships with wholesale customers to ensure reliable, high-quality supply and repeat business.

Sales Manager & Stock Controller

2021 – 2022

Provenderie du Kivu

- Managed the full sales process, overseeing customer orders and ensuring accurate, timely delivery of animal feed products.
- Monitored and controlled stock movement, tracking inventory levels to prevent shortages and reduce wastage.
- Coordinated between the warehouse and sales team to align stock availability with customer demand.
- Maintained sales records and stock reports to support business planning and decision-making.

EDUCATION

Degree / Certificate	Institution	Year
Advanced Software Development Certificate	kLab Academy, Kigali	2026
Bilingual Customer Service & Call Center Trainee Certificate	WEC Outsourcing	2026
Full Stack Development Certificate	ALIGHT Coding School, Gatsibo	2024
Commercial Management Diploma	Institut Saint Joseph, Goma	2014–2020

SKILLS

Frontend	JavaScript (ES6+), TypeScript, React, Vue.js, Next.js, Flutter
Styling & UI	HTML5, CSS3, Figma (prototyping to development)

Backend	Node.js, Nest.js, REST APIs, Firebase (Auth, Firestore, Cloud Functions)
Databases	PostgreSQL, MongoDB, Firestore
Tools & Deployment	Git, GitHub, Vercel, Render, CI/CD basics
Sales & Commercial	Sales management, stock/inventory control, supplier coordination, customs & merchandise declaration, cross-border trade
Soft + Business	Team collaboration, Agile workflows, Code reviews, Financial analysis, Digital marketing, Commercial negotiation, Bilingual customer service

PROJECTS

Fast to Hire – Infinity Innovations Co.

Next.js, Nest.js, PostgreSQL

- Contributed to a recruitment platform connecting recruiters with candidates – recruiters can post and manage openings while candidates search and apply for jobs.
- Built frontend features in Next.js and backend APIs in Nest.js, with PostgreSQL powering candidate and job data.
- Worked on matching-relevant features to help recruiters find suitable candidates and help candidates discover relevant openings.

Cohort-Based Learning Platform – Tech Guardians Team

React, Node.js, MongoDB, Next.js

- Architected the frontend component structure for a platform managing structured learning groups.
- Implemented real-time updates using MongoDB listeners – no page refresh needed.
- Collaborated with 4 other developers using Git feature branches and code reviews.

Alight Coding School Platform

React, Node.js, MongoDB, Render — https://cs-website-1.onrender.com/

- Built a student application system from scratch – users can apply, upload documents, and check status.
- Designed the database schema and REST API endpoints.
- Wrote reusable React components used across 5 different application forms.
- Result: Deployed and used by actual students at Alight coding school.

World Universities Explorer

Vue.js, REST API, Vercel — https://world-universities.vercel.app/

- Solo project consuming a public universities API.
- Implemented search, filter, and pagination for 10,000+ university records.
- Focused on responsive design and fast initial load (Lighthouse score: 85+).
- Result: Featured in kLab Academy showcase.

AWARDS AND HONORS

• Top Performer – ALIGHT full-stack bootcamp (recognized for mastery of React, Vue.js, and Node.js)

• Project Showcase – World Universities Explorer selected for kLab Academy portfolio display

• Rapid Skill Acquisition – Completed two intensive coding programs in 18 months while working independently

LANGUAGES

• French (Fluent)
• Swahili (Native)
• English (Intermediate)
• Kinyarwanda (Beginner)
